FIG.6

The screenshot displays a web application interface for user management. It features a 'Users' table with columns for 'User Name' and an expand/collapse icon. The table lists two users: 'Admin' and 'myuser'. To the right of the table, there are two tabs: 'User Details' and 'Permissions'. The 'Permissions' tab is active, showing 'User's Permission Groups' and 'User's Permissions'. The 'User's Permission Groups' section has a 'Group' header and a list of groups with checkboxes: 'Administrators' (unchecked), 'Developers' (checked), 'Order Fulfillment' (unchecked), and 'Sales' (unchecked). The 'User's Permissions' section has a 'Permission' header and a list of permissions with checkboxes: 'CustomerView' (unchecked), 'OrderView' (unchecked), 'ProductView' (checked), 'SalesView' (unchecked), 'ScriptView' (unchecked), and 'SecurityView' (unchecked).

• CADStar Product Data Sheet
194Kb

Description:

CADSTAR is Zuken™'s Entry Level Solution delivering one of the most powerful price/performance solutions in the world of PC-based PCB design. It runs under Windows NT, Windows 98 and Windows 95 operating systems.

771

The Entry Level Solution offers 'state-of-the-art' PCB design capabilities, and delivers a seamless design flow, which includes hierarchical schematic capture, comprehensive PCB layout, single operation post-processors for manufacturing, sophisticated library creation suites, automatic and interactive graphical routing. Superior integration features provide users with maximum flexibility in developing their EDA environment.

Strong partnerships and strategic alliances allow the Entry Level Solution to be used in conjunction with many of the market leading EDA software. This means greater protection of data integrity and ensures designs remain 100% intact at all stages of development.

Easy to learn and fast to use, the Entry Level Solution delivers workstation performance on a PC. From single-sided to complex double-sided, multi-layer and SMT designs, the tools will guide you through the design process and dramatically increase your productivity.

Features and Benefits:

• Single Environment for all PCB requirements

- Schematic capture, PCB Layout & Routing, all in one environment
- Seamless integration between logical and physical designs
- Embedded grid-free, auto interactive router with HS capabilities
- Engineering constraints managed 'up front' to reduce time to market
- Minimize placement time with automatic and interactive tools
- Eliminate errors by viewing true WYSIWYG split and partial power planes
- Create manufacturing data in minutes, not hours using single touch post processors
- Innovative Advisor for early identification and elimination of possible EMC problems

772

• Minimum System Requirements:

- Pentium Processor (233MHz or above)
- 32 Mb RAM
- 1024x768 resolution monitor
- 500mb Free HDD space
- CD ROM Drive

• Software System Requirements:

- Any of the following operating systems is fully supported.
- MS Windows 95
- MS Windows 98
- MS Windows NT v4.0 With service packs 3,4 & 5
- MS Windows 2000

774

• Input and Output File Formats:

- Input
- All previous CADSTAR files (.csa, .cpa, .csi, .cdi)
 - DXF
 - Viewlogic
 - CADIF (Zuken format)
 - P-CAD netlist
 - Orcad netlist
 - PADS PowerPCB

Output

- DXF
- CADIF (Zuken format)
- Gerber RS-274x
- NC-Drill Excellon
